

# 3M Supplies and Accessories

## 3M™ Manual Processing Chemistry

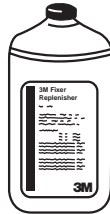

Premier chemistry for 3M premier X-ray film!

Developer/Replenisher

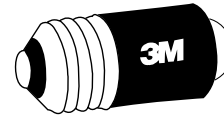

One gallon concentrate makes 5 gallons.

Fixer/Replenisher

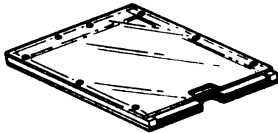

## 3M™ Long-Life Safelight

- **Long life** – 100,000+ hours
- 160° wide angle illumination
- No bulb or filter replacement
- Solid-State
  - Mounts directly in standard light sockets without modification (light socket required for operation)
  - Ultra-RED: Safe for all x-ray film types

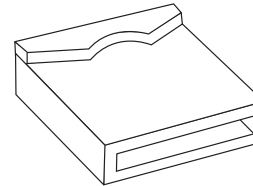

## 3M™ Contact Tunnel for the 3M™ Vinyl Cassettes

While very convenient, vinyl cassettes have an inherent problem of inconsistent film-screen contact which can result in a “fuzzy” non-diagnostic radiograph. The 3M contact tunnel for vinyl cassettes provides consistent, intimate screen-film contact for the flexible vinyl cassette.

## 3M™ Equine Footplate

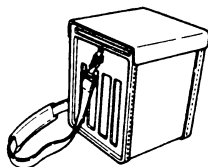

The 3M footplate was specifically designed with the equine practitioner in mind. The 3M Contact Tunnel or a hardback cassette (8x10) can easily fit into the footplate for distal limb radiography.

- Allows for full weight-bearing
- Durable exterior
- Light-weight

## 3M™ Vinyl Cassette Case

The 3M vinyl cassette case provides easy transportation and protection of the 3M contact tunnel and 3M vinyl cassettes. The case holds up to 40 3M vinyl cassettes. A “must” for the mobile equine practitioner!
